

# NUMBER GUESSING GAME WITH SCORE TRACKER

MEMBERS:
Dio, Jonella Eunice
Dorado, Naser
Sigovia, Adrian
Depra, Jee

**GROUP 4**

# DESCRIPTION:

— Simple Python game where computer picks random number 1-100 and player guesses.
— Provides hints TOO HIGH or TOO LOW.
— Counts number of attempt.
— Uses functions, loops, conditionals, random module..
— For entertainment and educational purposes, demonstrates ITE 260 fundamentals.

# OBJECTIVES:

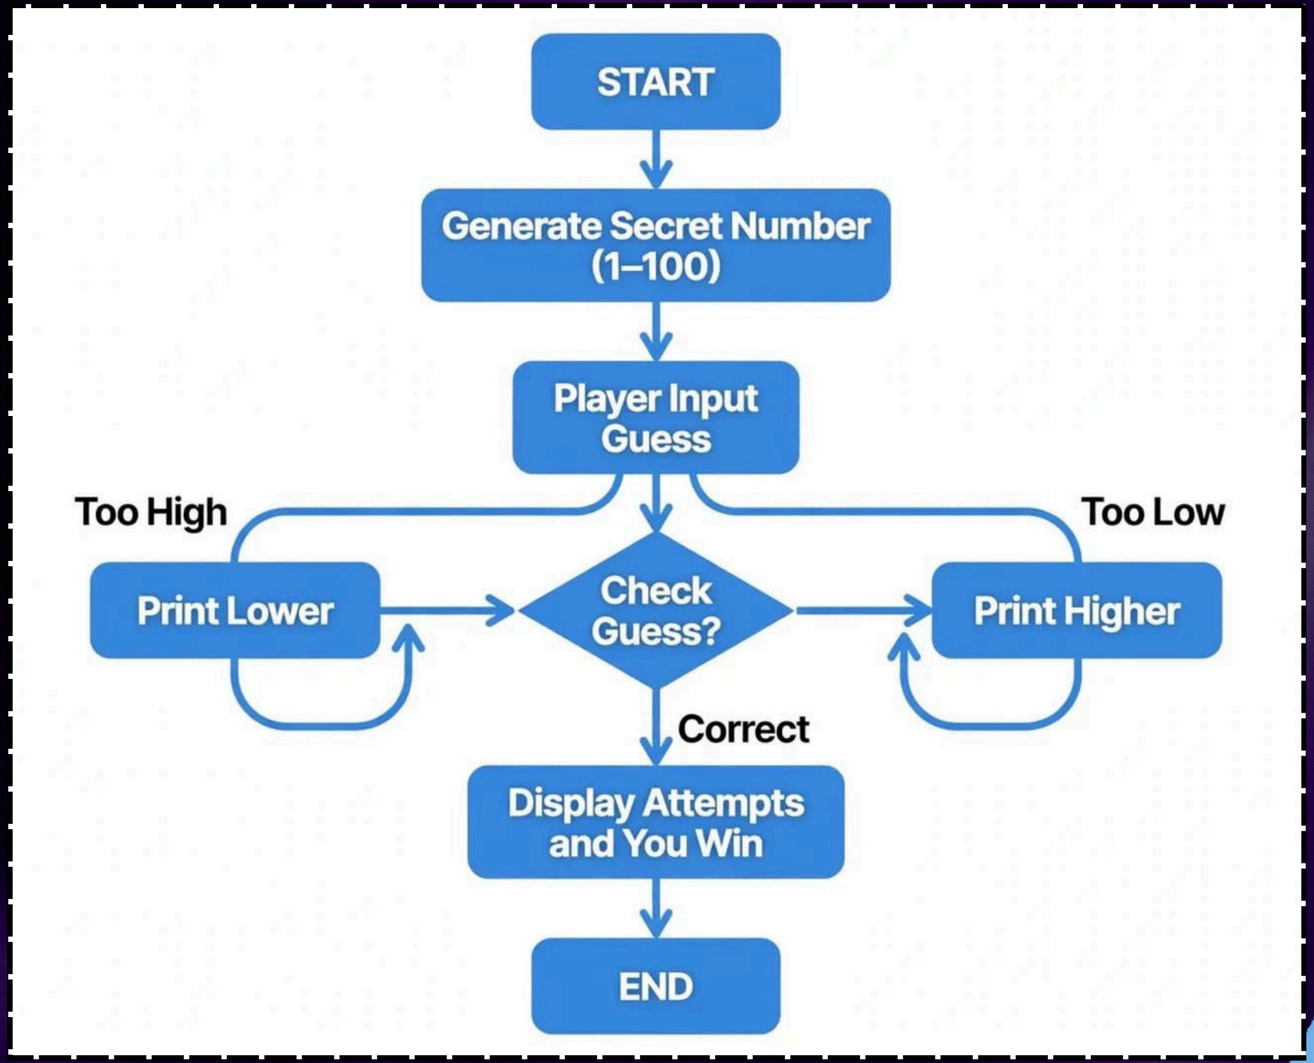

**General Objective:**

To develope a Number Guessing Game.

**Specific Objectives:**

1. To develop a module that generates random secret number from 1-100.
2. To develop a module that checks player's guess and provides hints.
3. To develop a module that counts attempts and displays result.
